Work Experience

Gentrack Ltd – Systems Consultant
February 2015 – November 2017

Responsibilities:
Product and software development. Starting with work and cost estimates, followed by quoting, internal development and testing, customer QA rollout, and finally release and monitoring of production environments
Genplus and VB6 coding to develop and release product upgrades
Writing SQL queries and functions
Time onsite for product go-live. Ranging from a couple of days to 6 weeks.
On-call shifts
Visual design and functionality design for FIDS (Flight information display screens)
Product testing

Key achievements:
Lead tester for the new features developed for our FIDS product. Determining which features were up to standard and would be introduced into the next version of FIDS.

Developing new designs and multilingual functionality for Sydney airport FIDS that will be used by the airport for years and will deliver concise flight information and boarding instructions to travelling passengers.

Becoming the expert of the FIDS product for the Auckland office, including overseeing the production implementation and rollout of the FIDS product at Gold Coast and Townsville airports.

Work Experience

Greenpark Products Ltd – Production Assistant
June 2008 – July 2011

Responsibilities:
Estimating production costs, calculating mark-ups and quoting prices for customers
Designing computer templates
Customer liaison
Liaising with factory staff to ensure timely production turn-around

Key achievements:
Learning and understanding all aspects of the factory production lifecycle.
Starting with gathering product requirements from customers. Recommending foam product, quoting prices and determining production turn-around time. Developing computer templates and operating machinery to produce the product. And finally, organising shipping and order delivery confirmation.

Countdown Supermarket – Perishables Assistant (Part-time during university)
